Experience

Mocha Technologies

June 2025 – Present

Software Engineer I - Full Stack Development

Mumbai

- Architected a scalable **Back-End** system for a Parcel Management platform using **Laravel** and **MySQL**, structuring schemas and composite indexing patterns to serve **500+** daily active users.
- Implemented granular **Role-Based Access Control (RBAC)** across **25+** secure API endpoints, enforcing route-level view and update authorizations for **5** distinct user roles.
- Accelerated** high-traffic application programming interfaces (**REST APIs**) by eliminating N+1 database query bottlenecks and removing redundant pagination logic, reducing server response latency by **over 60%**.
- Orchestrated** automated background processing workflows using **queued jobs** to manage **10,000+** cross-tenant device tokens daily, maintaining **99.9%** primary server performance.

Bot2Do Technologies

July 2024 – October 2024

Full Stack Software Engineering Intern

Mumbai

- Developed and deployed **MERN stack** web applications, rewriting front-end component rendering pipelines to reduce initial page load times by **40%**.
- Designed secure and scalable back-end infrastructure utilizing **Model-View-Controller (MVC)** architecture, capable of handling **1,000+** concurrent requests with robust data validation.
- Refactored complex database queries and **MongoDB** aggregation pipelines, resulting in a **30%** improvement in heavy reporting execution time for administrative dashboards.

Projects

Sorting Visualizer Web Application | React.js, Node.js, Express.js, MongoDB

February 2024

- Developed** an interactive web platform to visualize **15+** complex algorithms (Data Structures and Algorithms), utilized by **900+** students.
- Streamlined** virtual DOM rendering routines using **React.js** to render **1,000+** data points simultaneously, maintaining a consistent **60 FPS** frame rate without browser performance lag.
- Integrated secure user authentication using **JSON Web Tokens (JWT)** and OAuth2, managing **100%** of active user sessions securely.

Task Me Project Management Platform | React.js, Node.js, Redux, Tailwind CSS

July 2024

- Constructed** a full-stack collaborative software platform supporting teams of up to **15** members with secure email verification, activity logging, and real-time project status updates.
- Architected modular backend services with token rotation and **fine-tuned** data indexing, successfully scaling the database to handle **500+** high-frequency task updates daily.
- Implemented client-side state management using **Redux**, reducing redundant server network requests by **25%** and improving user interface responsiveness.

Achievements

Best Industry-Ready Patent Award — SAKEC TECH Symposium 2026

Mumbai

Granted a published patent for an advanced algorithm visualization system (Sorting Visualizer) engineered for scalable educational impact.

Education

Shah And Anchor Kutchhi Engineering College

Dec. 2021 – May 2025

Bachelor of Engineering in Information Technology

Chembur, Maharashtra

Technical Skills

Mobile Development: Flutter, Dart, iOS, Android, Cross-Platform Architecture, Mobile UI/UX, State Management

Programming Languages: JavaScript, Python, C, SQL, HTML, CSS

Back-End & Cloud: Application Programming Interfaces (REST APIs), Node.js, Express.js, Laravel, Firebase, MongoDB, MySQL

Tools & Software: Android Studio, Git, GitHub, Postman, Version Control

Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Programming (OOP), System Design
